The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 11, "the whole structure" lacks proper antecedent basis.

In claim 4, line 2, the phrase " $C_xH_yF_z$  gas (x, y, and z are 0 or any natural number)" is unclear because if x, y, and z are 0, then there is no main etchant gas at all.

Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action, (because the prior art does not disclose to perform an etching process using an etching mask for a trench to form a trench in such a way that the second interlayer insulation film is over-etched by using the etch-stopping layer as an etching barrier, and forming a metal line to bury the trench as claimed).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Park – US 6,303,486 , Sun – US 6,350,672 , and Lin – US 6,376,366 describe contacts and trenches.
